

LOW-CARBON WIRE

Bright Concrete Wire (ASTM A1064)

Tree Island Steel's concrete reinforcing wire is a premium wire for precast and cast-in-place applications, available with plain or deformed wire surface profiles. Concrete wire is available on wire carriers or in strapped coils with maximum package weights of 6,000 lbs.

Made from low carbon steel that meets ASTM A1064 / A1064M standards. Plain or deformed wire.

Diameter: D2.5 to D20

Packaging: Tubular carriers, compact coils or bundles of straight and cut pieces
